## CAREER OBJECTIVE

Motivated Computer Science undergraduate specializing in AI, seeking an entry-level software role to apply programming skills, problem-solving abilities, and hands-on project experience. Passionate about emerging technologies with a strong drive to learn, grow, and contribute to innovative solutions.

## EDUCATION

|                                                               |             |
|---------------------------------------------------------------|-------------|
| <b>Ashoka Women's Engineering College</b> , Kurnool           | 2023 – 2027 |
| <i>B.Tech in Artificial Intelligence and Computer Science</i> | 84%         |
| <b>Narayana Junior College</b> , Kurnool                      | 2021 – 2023 |
| <i>AP Board of Intermediate in MPC</i>                        | 95.4%       |
| <b>Viswa Bharathi High School</b> , Gadwal                    | 2021        |
| <i>TS Board of Secondary Education</i>                        | 100%        |

## TECHNICAL SKILLS

|                              |                                                   |
|------------------------------|---------------------------------------------------|
| <b>Programming Languages</b> | Java, Python                                      |
| <b>Web Technologies</b>      | HTML, CSS, JavaScript, Express.js, React, Node.js |
| <b>AI / ML</b>               | Artificial Intelligence, Machine Learning         |
| <b>Core Skills</b>           | Data Structures & Algorithms                      |
| <b>Database Systems</b>      | DBMS, MySQL                                       |
| <b>Productive Tools</b>      | Power BI, Tableau                                 |
| <b>Development Tools</b>     | VS Code, GitHub, Canva                            |

## PROJECT

### Stock Market Trend Predictor | Python, TensorFlow

- Developed a Stock Market Trend Predictor using the GRU deep learning model for time-series forecasting.
- Collected and preprocessed historical stock price data to train and validate the model.
- Implemented the GRU model to capture sequential patterns and predict future stock trends.
- Evaluated model performance using appropriate metrics and visualized predictions against actual data.
- Achieved improved prediction accuracy compared to traditional models, supporting better investment insights.

## TRAININGS ATTENDED

### Smart Interviews – Data Structures and Algorithm Program

- Learned advanced problem-solving techniques in DSA; participated in mock technical contests. Topics: Arrays, Trees, Graphs, Dynamic Programming, and more.
- Solved 200+ curated coding problems and implemented solutions in Python.

## CERTIFICATIONS

- Certified in Cyber Hygiene Practices Pledge under the ISEA Project by CERT-In, MeitY (Government of India).
- Certified in AI Skills Passport by EY and Microsoft.
- Certified in Smart Coder (DSA) by Smart Interviews.
- Certified in Data Visualization: Empowering Business with Effective Insights Job Simulation by Tata.
- Certified in GenAI Powered Data Analytics Job Simulation by Tata.

## STRENGTHS

- Quick learner and adaptable:** Picks up new tools, languages, and concepts with ease and adjusts swiftly to changing environments.
- Good communication skills:** Conveys ideas clearly and confidently, both in written form and during team discussions.
- Team player with a positive attitude:** Collaborates effectively, contributes constructively, and keeps team morale high.
- Self-motivated and disciplined:** Sets personal goals and follows through consistently without the need for constant supervision.
